SUMMARY

Full Stack Developer specialized in architecting **AI-integrated SaaS platforms** and **scalable IoT ecosystems**. Proven track record of delivering end-to-end greenfield projects, with expertise in modern frameworks (**React, Next.js, NestJS, Node.js**) and deployment infrastructure (**Docker, Linux, AWS**). Strong capability in driving technical decisions, optimizing real-time data orchestration, and maintaining absolute ownership of the software development lifecycle.

EXPERIENCE

Full Stack Developer | Nu Teknoloji | November 2025 – Present

- **Architected and delivered 3 greenfield projects from scratch**, including leading the development of an industrial IoT platform, maintaining absolute ownership over the software lifecycle—from initial architecture to production release—using **React, Node.js, and PostgreSQL** for real-time data orchestration.
- **Managing Linux-based server infrastructure and orchestrating production deployments using Docker**, ensuring reliable, streamlined release pipelines for the engineering team.
- **Spearheading the backend development of a new scalable architecture utilizing NestJS** to enhance API performance and system modularity.
- Collaborating closely with the Engineering Manager on tech stack evaluation and performing regular code reviews to drive the adoption of modern development patterns.
- **Designed and architected a library of custom UI widgets and components** to handle high-frequency real-time datasets, optimizing rendering performance for industrial monitoring.
- Developed a Custom Device Simulation Tool using Three.js, JavaScript, and Node.js to virtualize hardware telemetry, enabling feature testing without physical hardware constraints.

Full Stack Developer | TalentRank.Ai | December 2024 – September 2025

- Developed an AI-powered hiring system automating candidate interviews using Heygen avatars and OpenAI-based analysis workflows.
- Built responsive, full-stack interview interfaces for both desktop and mobile using Next.js and Express.js.
- Integrated AWS S3 for secure video upload and storage, and Deepgram for automated audio transcription.
- Connected Paddle as a global payment solution, enabling monetization for B2B clients.
- Delivered key production-ready features, including company-facing video review dashboards, internal admin management portals, and public product landing pages.
- Spearheaded end-to-end feature delivery in a fast-paced startup, architecting the integration of AWS S3 and Deepgram for seamless audio processing that scaled to support 100+ daily interview sessions.
- Collaborated closely with product and design teams, ensuring high-quality UX across platforms.

Freelance Frontend Developer | June 2024 – December 2024

- Delivered two end-to-end web applications ahead of schedule using Next.js and Tailwind CSS, increasing client user engagement by 17% and establishing a scalable foundation for future feature rollouts. Implemented UI/UX best practices to enhance usability and user engagement.
- Led the design and implementation of responsive, interactive user interfaces using Next.js, React and Tailwind CSS. Utilized state management tools like Redux Toolkit for efficient data flow and application performance.
- Integrated frontend features with RESTful APIs for dynamic data interaction. Conducted code reviews and collaborated effectively within project teams to maintain clean and scalable codebases.

UI Developer Intern | Jotform | August 2023 – September 2023

- Developed a custom chatbot project on the Jotform platform to enhance user interactions.
- Created responsive and interactive UIs using React, Jotform API, and Figma for prototyping and design.

EDUCATION

Bachelor's in Computer Engineering | Istanbul Medeniyet University | August 2021 – June 2024

- GPA: 3.0/4.0
- Member of Medeniyetekno student club
- Undergraduate Transfer

Bachelor's in Computer Engineering | Bursa Uludag University | September 2020 – August 2021

TECHNICAL SKILLS

- **Core Technologies:** JavaScript (ES6+), TypeScript, HTML5, CSS3.
- **Frameworks & Libraries:** React, Next.js, Node.js, NestJS, Express.js, React Native, Three.js, Tailwind CSS.
- **Databases & Storage:** PostgreSQL, Firebase (Firestore & Storage), AWS S3.
- **DevOps & Infrastructure:** Docker, Linux.
- **Integrations & Logic:** OpenAI API, QStash (Queuing), Paddle, Deepgram, RESTful APIs.

LANGUAGES

- **Turkish:** Native
- **English:** Advanced
